# ISPS 2009

## 9<sup>th</sup> International Symposium on Programming and Systems

**May 18-20, 2009**

**Aurassi Hotel, Algiers, Algeria**

<http://www.isps2009.org>

### Conference Chair

Zaia ALIMAZIGHI, USTHB University

### Program Committee Chair

Slimane LARABI, USTHB University

### Organizing Committee Chair

Latifa Mahdaoui, USTHB University

### Paper submission

All submissions will be handled electronically and posted on the conference website in PDF format. Submissions must be anonymous, limited to 8 pages and written in English language. Detailed instructions are available in the website.

### Review Process and Proceeding edition

All papers submitted to ISPS2009 will be reviewed by three reviewers. Papers that have been conditionally accepted will be reviewed again after re-submission. Accepted papers will be published in the symposium proceedings and distributed at the conference.

Submission of full paper: January 16, 2009

Notification of acceptance: March 6, 2009

Camera-ready paper: March 16, 2009

Registration: April 3, 2009

### SCOPE

Following the International Symposium on Programming and Systems, the 9<sup>th</sup> in the series will be organized by the Computer Science Department of the University of Science and Technology HOUARI BOUMEDIENNE (Algiers, ALGERIA) and will be held in Algiers, May 18-20, 2009.

ISPS'2009 is dedicated to bring together scientists from the world over, particularly from developing countries, to share and exchange knowledge, experience and most recent developments in computer science research.

This ninth conference will be organized in three parallel tracks with three separate lecture committees: "Artificial intelligence", "Software Engineering, Database and Information Systems" and "Systems and Networks Communications".

ISPS'2009 conference invites paper submissions presenting original work within a range of topics (not limited) related to three main tracks:

#### Track 1: Artificial intelligence

- Artificial intelligence: Theoretical foundations
- Machine learning
- Data mining
- Pattern recognition
- Computer Graphics, Vision and Image Analysis
- Nature-Inspired Computing

#### Track 2: Software Engineering, Database and Information Systems

- Software Engineering
- Knowledge Representation, Retrieval and Engineering Tools
- Software Architecture, Maintenance, Evolution
- Data Warehouses
- Information Retrieval and Database Systems
- Metadata and Semantic Web
- Verification and validation of systems

#### Track 3: Systems and Networks Communications

- Distributed Systems
- Wireless networks
- High speed networks
- Mobile and Ad-hoc networks
- Security systems
- Multimedia communications system

**Program Committee Chair:** Prof. S. LARABI, USTHB University, ALGERIA
